

ARK-LA-TEX DENTAL ASSISTING ACADEMY

910 Bert Kouns Industrial Loop Shreveport, LA 71118 # (318) 453-9589 Fax: # (318) 686-4505

Dear **Interested Student**,

A career of helping people improve their dental health will be rewarding and enormously satisfying for you. No two days will ever be the same and your job will continuously renew itself.

It is a career that will always be in demand and in need of capable, trained and caring Dental Assistants. It could be a perfect career for you.

Dr. Rich Erickson started this similar program in 1987. It was the first program in the country to train dental assistants in an actual practicing dental office. All classes will be held in our office and you learn from dental professionals who practice and teach the most current up-to-date methods. Our next dental assisting class will begin on:

August 12, 2023

We have enclosed some registration information if you wish to inquire about our next class. We offer several tuition payment options from weekly payments to monthly Care Credit payments. There is also an additional discount for payment in full.

There are many dental assisting programs to choose from in this area. We are proud of the low cost of our program. We also won't waste your time teaching you subjects that do nothing more than inflate the program to 6 months as other schools do to justify a tuition of \$10,000.

The course is designed to give the student maximum "hands-on" training and experience in a real, working dental office. Our facility is equipped with the very latest state-of-the-art dental equipment and audio-visual teaching aids. You will be taught the most up-to-date techniques using the very best technology available. The teaching is stimulating, fast paced, and relies heavily on individual participation. Each group is no larger than one instructor per eighteen students. This insures personal attention and a worthwhile learning experience. You will not have time to be bored.

Please read over the information and call us if you have any questions. We look forward to having you in our next class!

Classes Fill Up Quickly So Register To Start Your New Career Today!

About Our Program:

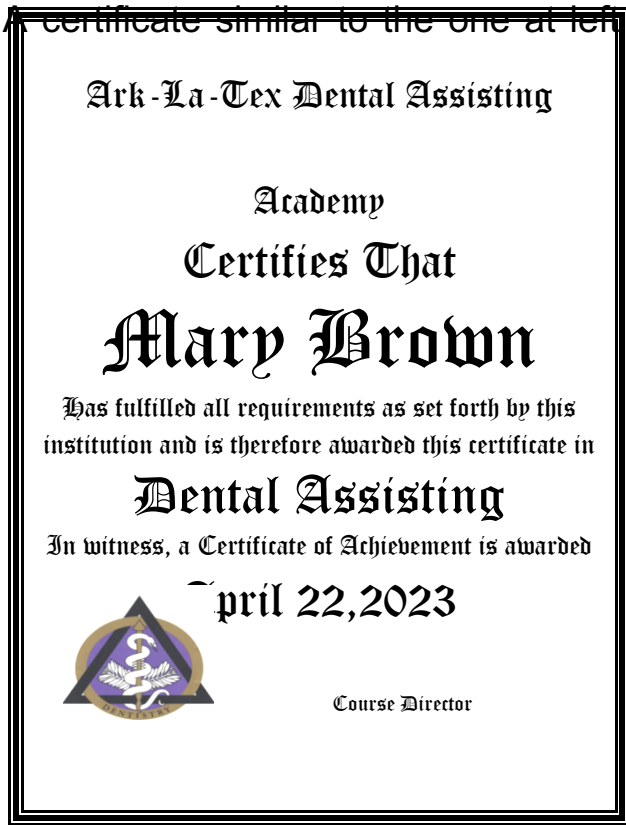

The job opportunities for trained dental assistants are quite good in today's marketplace. In most parts of the country, there is an acute shortage of dental assistants. An examination on job search sites shows that the demand for dental assistants is quite strong. This is true all over the country as well. The majority of these ads require experienced applicants.

Following your training in this ten week course, you will have the confidence and skills necessary to apply for these positions. Along with your diploma and x-ray certification, we will provide a letter of recommendation and a summary of your training experience to those students with a 70% or above grade average for the course.

Part of your training will involve the Job Interview itself, how to prepare for it, how to dress, what to say, etc. So often, jobs are lost during the first five minutes of the interview. We feel it is important to train you in this area, as well so that you will stand out from the rest of those competing for a position in this field.

Dental Assisting is a very rewarding job in itself. One of the factors driving job-seekers today is salary. The average dental assistant has the opportunity to make a wide range of wages. Salaries depend on where the dental office is located, the size and efficiency of the staff, and the productivity of the office. The more experienced you are at your job, the better you will be able to serve the patients and the staff at your future employment.

Another aspect of what to look for in a job is personal satisfaction. Working as a dental assistant in the health care community is challenging and rewarding at the same time. You get to experience working face to face with the people in your community who truly need your help. You will get to see how your hard work can positively affect someone's life. This is the real reason we offer this course to you.

with no payment to the student. This will provide the student with the required X-ray certification necessary to work in the state of Louisiana.

All supplies, materials, teaching aids, books, etc., are supplied at no additional charge. There are no hidden costs beyond the tuition for the course.

Our course is unique, in that it is taught in an actual practicing dental office. You will learn the state-of-the-art methods in assisting. Our staff has many years' experience in the dental profession in teaching the art and science of dental assisting. We update our course to stay ahead in healthcare.

and

The course is given twice a year: January and August. The classes are taught on Saturdays so you may continue your full-time job while you train for your new career in Dental Assisting. We also have opportunities to observe experience at work. Following the course, local dentists can contact us and we will be more than happy to provide them with the list of graduates and how well they performed. This is an excellent referral source for the start of your career as a well-trained dental assistant.

Make A Decision That Could *Change Your Life!*

Ark-La-Tex Dental Assisting Academy

Course Outline

The following subjects are covered in depth from both a didactic and a practical clinical experience. The morning lecture is followed by an afternoon of clinical, "hands on" training in our *state-of-the-art* practicing dental office. During their course of study, the students learn the operation of all equipment, instrumentation and materials commonly used in a general dental practice. All students receive in excess of 8 hours of instruction in radiology. Our students have been trained in many of the "expanded duties" as well... Details of the student's extensive clinical training are outlined below.

I. Dental Theory and Terminology

- A. Dental and oral anatomy, tooth identification and numbering system
- B. Instrument nomenclature and identification for all aspects of General Dentistry
- C. Dental terminology
- D. Equipment operation, chair positioning, assistant equipment usage
- E. Treatment options available, depending on oral conditions

II. Receptionist - Front Desk Office Management

- A. Phone techniques and appointment book control
- B. Billing: accounts receivable and accounts payable, collections
- C. Filing insurance forms and pre-treatment estimates
- D. Insurance terminology

III. Four-Handed Dental Assisting

- A. Instrument transfer techniques, chair-side assisting and patient suctioning
- B. Chair-side doctor-patient-assistant positioning
- C. Tub and tray systems of instruments and materials
- D. Familiarity and use of instruments and materials in assisting for:
 - 1. Operative Dentistry-amalgam and composite restorations
 - 2. Oral Surgery - instruments, procedures and post-op protocol
 - 3. Crown and Bridge – polyvinyl impression taking, temporary fabrication, cord packing, hemostatic agents, introduction into various crown types
 - 4. Endodontics - instruments, medicaments and materials: how and why they are used
 - 5. Periodontics - disease origin and usual treatment methods
 - 6. Pedodontics - commonality and differences in treating children vs. adult patients

IV. Radiology

- A. X-ray theory and technique, use of Rinn® holders and other methods
- B. Intraoral, bitewing, panoramic, and endodontic exposure methods
- C. X-ray identification, interpretation, safety and precautions

V. Impressions and Model Trimming

- A. Impression materials and practice in their uses: alginates, poly vinyl siloxane, etc.
- B. Digital Scans using Itero scanner.
- C. Model pouring and trimming

VI. Cements and Liners

- A. Introduction to various cements and liners used in dentistry
- B. Practice mixing cements and liners

VII. Sterilization Techniques

- A. Sterilization theory and terminology, autoclave operation
- B. Instrument and equipment sterilization / disinfection
- C. Treatment room disinfection and asepsis techniques
- D. Hand piece care and maintenance

VIII. Job Interview and Placement Assistance

- A. Proper image, dress, resume, and how to prepare for the job interview itself
- B. Difficult questions you may face - how to answer them
- C. Do's and don'ts during the interview, what to expect.
